-This is an application for an existing pond that was constructed in 1970 on Nassau creek, -in the upper Calaveras river watershed, Calaveras county, California. The "facility" sea--sonally stores a maximum of 40 acre feet of water in an on stream pond. The pond has a -maximum surface area of 6.4 acres. It was constructed by excavation of soil from near -the channel, and constructing an earthen dam 18feet high, 18feet wide, and 225 feet -long. Water exits the pond via a spill way and rocky channel located on the north west -side of the pond about 150 feet from the dam. The water will be (and historically has -been, since 1970) used for wildlife habitat, fire protection, aesthetic enhancement, recre--ation, domestic use, and occasional seasonal irrigation of up to 5 acres of pasture land. -Please see attached report for a more detailed description of the pond.
